SILVER PEAK IS OUT WITH REPORT

Close to the Normal Capacity Now.

EARNINGS GENEROUS

Close to Quarter Million Dollars Surplus Held in the

Treasury.

The Pittsburg Silver Peak company has issued the following report to stockhold-ers for the lest mix months of 1911:

An average of 1155 stamps, of the total number of 120, were in continuous operation during the six months ending December 51, 1911. Bullion from 92,546 tons of ore was extracted during the six months, giving an average gross return

Fire Proof Buildings.

On July 15, 1911, our boarding house and our bunk house were completely destroyed by fire. In their stead we have erected fireproof buildings of steel and concrete construction with all modern conveniences, for the comfort of our The net amount expended to

werkmen. The net amount expended to replace those buildings, vis., \$21,530,34, has been charged to profit and loss.

The federal court at San Francisco rendered a decision favorable to the company affecting the suit of Gamble et al. vs. Hatchett et al. now pending in the Nexada supreme court. We are daily expecting a decision from the Nexada supreme court.

MAYFLOWER HAS A SPLENDID NEW LODE

George L. Walker in his copper letter of March 1 says that Marflower's recently discovered tode is now being talked of as one of the most important that has ever been found in the Lake Superior district. Drill No. 17 penetrated copperbearing rock for nearly 200 feet. The studge from the drill was sampled every few feet from a depth of 1016 to 1683 feet. Assays of these samples returned all the way from 0.57 to 3.54 per cent copper, and worked out an average of 26.25 pounds to the ton of rock. This seventy-two feet vertically on a lode having a 50-degree dip indicates a true width of fifty-five feet, which is nearly twice that of any lode now being mined in the district.

having a so-degree dip indicates a true width of fifty-five feet, which is nearly twice that of any lode now being mined in the district.

The spiendid showing disclosed by this second hole through the lode tends to strongly confirm what the first suggested, that there is the making of a big mine in the Mayflower and Old Colony properties. Some uning men who refused to take more than a passing interest in the core from hole No. 16 are now buying the stocks of both companies, rotwithstanding their higher price level.

It is the popular impression that Mayflower will have to sink a shaft 200 or 120 feet to reach the copper-bearing ground recently discovered, and that a year or more will be consumed by the work. While this assumption is literally correct, it falls to take into consideration the undoubted fact that the lode will be found mineralized at or near the surface, and that short crosscule every 100 or 125 feet down, as the shaft is sunk, will open the lode and from these drifts will be driven to test its value.

It will be recalled that the lode in the Lake Copper property was located by a diamond drill, that the outcrop was then uncovered and the shaft sunk in the hole. The same practices would have been followed at the Adventure but for the fact that the lode in the Lake Copper property was located by a diamond drill, that the outcrop was then uncovered and the shaft sunk in the hole. The same practice would have been followed at the Adventure but for the fact that the outcrops of its lodes could not be located above, in keeping with the usual geological formation of the Mayflower and Old Colony properties is high and dry, and there is very little overburden.

There should be no long periods of waiting for new developments in these properties. The Old Colony's drill may cut the lode almost any time. Within five or six weeks the snow will be off the ground and then surface exploration, in search of the outcrop, will be started an both properties.

A Cold. La Grippe, Then Pneumonia Is too often the fatal sequence, and roughs that hang on weaken the system and lower the vital resistance. Foley's Honey and Tar Compound is a reliable medicine that stops the cough promptly by healing the cause, soothes the inflamed air passages, and checks the cold. Keep always on hand, Refuse substitutes. Schramm Johnson, Drugs,

the Never-Substitutors, five good stores. THE ART OF PRINTING

Would be lost in Salt Lake if the Century were not in business, 55-57 Post-office place. \$40,00

To Los Angeles and return. Land show March 8-9-17 to help boost Utah. Tickets and information, 169 South

OPOHONGO TO POST - THOMPSON-QUINCY AN EARLY DIVIDEND

Before End of Month, Say Reports.

thick and fast during the past few days to the effect that the Opohongo commany would begin regular monthly or quarterly dividends before the end of this Raise From Depth Is Not Yet Thomas Kearns, who has been in Nevamonth, and on his arrival from California Wednesday morning President Wil tiam Natueld was asked for a confirma tion of the same. He stated that while

SWANSEA GETS BIT OF STRENGTH BACK

Swansea Consolidated speeceded in weathering the pressure of profit taking and those bearfaldy inclined Wednesday on the exchange, closing stronger after heavy selling and retaining the market leadership, which it has held for neveral dars past. Colorado was much stronger, indicating confidence in the certainty of the coming dividend, Opolongo was firmer in the glare of the report that the company this month would get down to a settled dividend basis.

Altogether, it is a satisfactory market and one in a position to improve unless the short crowd again sharpens its harpoon for another campaign. Sales yesteriay totaled \$7,238 shares of stock, the market value of walch was \$11,734.5. The following were the closing unlisted and listed stock transactions.

HALIFAX SHAFT IS AIMED FOR THE ORE

Company Operating Mill at Regular Dividends to Start Director George W. Morgan Vice President Kearns Expects Is Back From Satisfactory Ore Within the Coming Mine Visit. Ninety Feet.

There have been rumors flying round GOOD STREAK RICH ORE

to Contact Which Is

tion of the same. He stated that while the raine was in fine condition, as indicated by reports from the management while he has been away, and the company is carning more than dividends at this time, he prefers to visit the property for the purpose of seeing actual conditions for himself before he gives out any information in regard to the dividend after or amounts.

The company, it is well known is shipping about four cars of ore a week and that the carnings should be piling up at the rate of \$15,000 to \$20,000 monthly. The company several months ago declared a dividend of one cent a share, which called for between \$3000 and \$9000, so the company is castly in a position to pay monthly or quarterly dividends at this rate.

It is understood that the company is free from indebtedness and that the ionage how available on the various levels is both extensive and of a first-class shipping grade, throughout. Every condition at the property lustifies the dividend expectations of shareholders.

City was scallable on Wednesday morning on the return from the camp of Grovge W Morgan, a director of the organization. There has been more inquiry about this one mine during the past week or ten days than ever before, and reports have been legion in regard to what the management has broken into and the value of the same.

The menagement, states Mr. Morgan, is making from its 1650-foot level, the 1290-foot level of the Daly West following a fissing to the contact. At the face there is an eighteen-nich streak of as fine-looking a grade of shipping ore as he ever saw anywhere in Partic City. The value of the camp the contact of shipping ore as he ever saw anywhere in Partic City. The value of the same.

CONDITIONS GOOD

ment within ninety days will send the shaft directly into a big body of ore la the firm conviction of Vice President Tonopah Belmoni and other mines of th Sagebrush state. The Hallfax compan-

to Contact Which Is

Objective.

Objective.

The first authentic information in regard to the conditions at the Thompson-grain and the conditions at the Thompson-ling on the return from the camp of George W. Morgan a director of the organization. There has been more inquiry about this one mine during the nest week or ten days Ham ever before, and reports for the days Ham ever before, and reports have been legion in regard to what the management has broken into and the value of the same.

The management states Mr. Morgan is The management has broken into and the value of the same.

The management states Mr. Morgan is foot level of the Daly West following a front level of the Daly West following a find the value of the Same.

The will be conditionally the conditions indicating that through everything points to the contact has not been sailed varies in whith from three to five feet. The contact has not been sailed varies in whith from three to five feet. The contact has not been sailed varies in Park City. The voin itself varies in whith from three to five feet. The contact has not been sailed varied and points to the conditions findership that through everything points to the conditions and points to the conditions findership that through everything points for the solid of ore. Eight to ten tons of high gradient with the proper opportunity the Thompson-Quiney will be one of the big spinners of extraction should be very low, as not a pound of ore need be hoisted, all of it height mine by stopping and dropping the same to the counted by the officials for economical mining. The cost of cytractics should be very low, as not a pound of ore need be hoisted, all of it height mine by stopping and dropping the same to the counter of the same to the counter

don decrasing the copper output slightly increasing, with the probability of highe copper prices for this year, that the com-pany during 1912 will witness a most saf-infactory year.

COMMENT UPON UTAH COPPER DIVIDENDS

An easiern authority stated via the Pollok wines yesterday that there was little or no likellhood for the immediate present of the Utah Copper company increasing its dividend, although, he continued, the company on a 14h-cent copper metal market is earning on the annual basis of \$1 per share.

This is in line with an interview of one of the officials of the company recently in New York, who said that the company had a great deal of new stripping to do yet before it could increase its dividend rate.

Ore Shipmenta. The Utah Ore Sampling company of Wednesday released five cars of ore from Utah mining camps.

What We Never Forget according to science, are the things as-sociated with our early home life, such as Bucklen's Arnica Salve, that mother or grandmother used to cure our burns

boils, scalds, sores, skin eruptions, cuts, sprains or bruises. Forty years of cures prove its merit. Unrivaled for piles, corns or cold sores. Only 25 cents at Schramm-Johnson, Drugs.

Compare the taste of Schlitz in BROWN BOTTLES with beer in light bottles

Schlitz is as pure when poured into your glass as when it left the brewery. It's the Brown Bottle. It keeps out the light. Light develops in beer a peculiar taste and a disagree. able odor.

This is not a theory. It is a fact proven by scientists, Schlitz is properly aged before leaving the brewery.

It will not cause biliousness, nor ferment in your stomach.

Phones [Bell 2558 Ind. 287

Schlitz in Brown Bottles costs you no more than common beer in light bottles.

That Made Milwaukee Famous

DEMAND FOR COPPER VERY NOTICEABLE

James A Pollock Co., bankers and prokers, furnish the following, received over their private wire yesterday after-

Paine, Webber & Co., Boston,-Ar eadian was the feature for activity and strength in Boston this morning on report strength in Boston this morning on report of rich drill core being taken from sec-tion? of their property. There was heavy buying from the Lake Superior district. Later, stecks of all the adjoining prop-erties became active and stronger. East Butte was more active and well bought today, on favorable reports of earnings on the advanced metal prices. The inter-est in corners is increasing daily and the on the advanced metal prices. The inter-est in coppers is increasing daily and the demand for the metal today was on a larger scale, both for foreign and domestic consumption. The latest estimates on the Producers' report to come briday are for a decrease of 10,000,000 pounds. Still favor purchases of all coppers, especially on reactions.

favor purchases of all coppers, especially on reactions.

Logan & Bryan, New York.—Market today was somewhat reactionary, which was not unnatural in view of the recent advances, but it was quite noticeable that when prices receded the volume of trading contracted, which was taken as an indication that the desire to liquidate was not too prenounced. Judging by the tenor of foreign advices satisfactory progress is being made in connection with the matter adjusting the labor difficulty in England, and it is not improbable that as soon as the affair is eliminated as a disturbing influence scattment, not only in England, but also on the continent, will show a decided improvement. While politics are still unsetling, and labor and trade conditions on this side not all that could be desired, still it is quite apparent that strong interests are arrayed on the buying side of the stock market and we are inclined to look for a further upturn. Hayden, Stone & Co., Boston.—The late session of the Boston copper share market has developed very little interest and, taking the market as a whole, there has been very little change from the morning session. Franklin has been about the only feature, advancing to 142. The balance of the list is holding well, although the market as a whole is suffering from realization sales after the advance of the last few days. Undertone still keeps strong.

Hornblower & Weeks, Boston.—Coppers continued strong today, and while there was profit-taking in certain stocks, others that have been rather quiet were taken in hand and advanced from a fraction to over a point. The buying continues good and offerings are easily absorbed. Sentiment continues buillan and on all reactions it looks as if coppers were a pretty safe proposition to buy.

Metal Market. Logan & Bryan, New York.-Market to-

Metal Market.

The metal quotations for Wednesday, oated by McCornick & Co., were as fol-lows: Silver, 58%; lead, \$4; copper, \$14.10. Van Camp Pork and Beans, now 10e.

GUSTAVE DINKLAGE,

NORTH BUTTE DOING IMPORTANT WORK

Few realize the importance of the deelopments which have been taking place on the Snowball vein of the North Butte property and what the higher copper and silver contents in these bres mean to the company in dollars and cents, say Thompson, Towle and Co.

The ore of the Snowball vein, which is one of the company's latest and most important developments, carries, approximately.

The ore of the Snowball vein, which is one of the company's latest and most important developments, carries approximately double the copper contents and more than three times the silver values of the average of North Butte reserves. This ore is direct smelting, and owing to the high copper conents and the exception is extremely low.

In maintaining the normal production of copper, North Butte has been mining in the neighborhood of 11,00 tons of ore per day, or upwards of 30,000 tons per month. On this production the company has made net profits largely in excess of its dividend requirements.

Computations which we have made on the Snowball ores indicate that an output of but 3000 tons per month would be necessary to maintain the present dividend of \$1.20 per share, or but one-tenth of the company's normal tonnage.

Three levels on the Snowball vein are now advancing to the westward and developing good ore. In this connection it is significant to note that the ore taken from development work alone on these

from development work alone on these levels is nearly sufficient, under existing metal conditions, to maintain the com-pany's present dividend.

CHIEF MAKING BIG HEADWAY AT TINTIC

The Chief Consolidated stock was a big feature in Boston on Wednesday and on inquiry at the Tintle offices yesterday it was learned that the property was showing a continual improvement. The ore shipments this week will reach a total of sixteen cars, against fourteen last week and thirteen the week before, and it all is fine grade material, running into money fast. President Walter Fitch is in Chicago at the present time. Ore and Bullion.

The ore and bullion report for Wednesday, given by McCornick & Co., was as follows: Ore received \$50,000; bullion hipped, \$70,000; total, \$150,000

Many Driven From Home. Every year, in many parts of the country, thousands are driven from their homes by coughs and lung discases. Friends and business are left

behind for other climates, but this is costly and not always sure. A better way—the way of multitudes—is to use Dr. King's New Discovery and cure yourself at home. Stay right there, with your friends, and take this safe medicine. Throat and lung troubles find quick relief and health returns. Its help in coughs, only or or croup. help in coughs, colds, grip, eroup, whooping cough and sore lungs make it Tribute Want Ads.
